# Take Organizational Performance to the Next Level with CMMI® V2.0

Build on the organizational success you have achieved with CMMI V1.3. Use CMMI V2.0 to build capabilities and employ value drivers, standards and features that will elevate organizational performance.

Through an integrated product suite, CMMI V2.0 aligns business goals directly with operations and capabilities to drive measurable improved performance in terms of time, quality, budget, customer satisfaction and other key drivers.

Integrated Product Suite

CMMI V2.0 is an integrated product suite consisting of 5 components that, when used together, provide a clear and proven path to achieving your business objectives.

Appraisal Method
A new appraisal method helps to increase reliability while reducing overall cost.

Training & Certification
Updated training has modular components with virtual and in-person options. The training is more learning objective oriented.

Model
Clear pathway to performance improvement. Simplified for accelerated adoption.

Adoption Guidance
Guidance to help new adopters and users get started with CMMI V2.0. Provides a smooth transition from CMMI V1.3 to V2.0.

Systems & Tools
Redesigned system to access online models and resources.

Take a look at some initial performance results of CMMI V2.0 adoption:

Productivity increased **14%**

Profitability increased **57%**

Defect reduction of **20%**

Rework reduced **70%**

On-time delivery rate of **97%**

Estimation accuracy improved **17%**

Build on Business Performance with CMMI V2.0 Improvements that include:

Built-in Performance-Driven Capabilities

At every level, V2.0 demonstrates the value and ROI of implementing CMMI. Tangible business performance results are now built directly into the model practice areas and practices, as well as the appraisal method.

Reliability AND Reduced Life-Cycle Costs

Increase the value of benchmarking while reducing time, effort and cost. V2.0's new appraisal method improves reliability and confidence in the results. Reduced preparation time lowers the appraised organization's total life-cycle costs.

Current and Future Business Relevance

V2.0's scalable architecture platform enables interoperability guidance that aligns with current trend methodologies. Brand new practices, such as Enabling Virtual Solution Delivery (EVSD), Safety and Security, and Agile with Scrum guidance, ensures V2.0 addresses current and emerging business needs.

Usability

With non-technical language, easier-to-understand practices, tools that guide transition/adoption, and an online viewing platform for speedy access to the practices you want, V2.0 improves business performance effectively and efficiently.

Sustainability

The non-technical language, practices and adoption guidance, as well as the online scalable architecture supports the future of method guidance and additions—in new and emerging practice areas that the future will bring!
